PROJECTS

TITLE: AI Powered Real-Time Monitoring and Vigilance Alert System
GOAL: The project aims to create a real-time face detection and tracking system with alerts, a user-friendly interface, and optimized performance for diverse settings.
TITLE: Object Measurement Detection by Using AI
GOAL: Our prototype uses a built-in camera to measure object sizes and convert these measurements into a digital format. It captures and saves both the measurements and the images to a designated folder.

ACHIEVEMENTS & AWARDS

I won first prize in the 24-hour Hackathon conducted by the Department of Information Technology at Kongunadu College of Engineering and Technology.
